

## CONTENTS

<b>Dedication: The journeys of Kyo Watanabe</b> .....	viii
<b>Preface: The future of nucleosides</b> .....	xi
<b>Acknowledgments</b> .....	xiii
<b>Biographies</b> .....	xiv
 <b>HISTORICAL PERSPECTIVE</b> .....	 1
The history of the chemistry of nucleosides and their use and potential as therapeutic agents.....	3
<i>Kyoichi A. Watanabe and Steven E. Patterson</i>	
 <b>ANTIVIRAL CLINICAL DEVELOPMENT: PROMISE AND PROFITS</b> .....	 57
Treatment of chronic hepatitis B and C: Review of literature.....	59
<i>Artemio John C. Mendoza, Jr. and Bruce Polsky</i>	
Advances in antiviral nucleosides.....	101
<i>Hyunah Choo, Youhoon Chong, Giuseppe Gumina and Chung K. Chu</i>	
The global antiviral therapeutics market.....	159
<i>David Franklin, Alan S. Roemer and Laurent Placidi</i>	
 <b>NEW DIRECTIONS IN NUCLEOSIDE CHEMISTRY</b> .....	 185
Disaccharide nucleosides, an important group of natural compounds.....	187
<i>Koen Nauwelaerts, Ekaterina Efimtseva, Sergey N. Mikhailov and Piet Herdewijn</i>	
The reaction of alcohols and nucleosides with methylenebis(phosphonic acid dichloride): Facile synthesis of methylenebis(phosphonic acid) monoesters.....	221
<i>Steven E. Patterson, Jeremy L. Clark, J. Christian Mason and Krzysztof W. Pankiewicz</i>	
Synthesis and <i>in vitro</i> anti-HIV activity of 2'-fluoro-2',3'-didehydro-2',3'-dideoxy purine nucleosides.....	227
<i>Peiyuan Wang, Marjorie Adams, Jason P. Grier, S. Balakrishna Pai, Judy Mathew, Kyoichi A. Watanabe, Michael J. Otto, Giuseppe Gumina, Chung K. Chu and Raymond F. Schinazi</i>	
Sugar-modified thionucleosides: Chemistry and inhibition of ribonucleotide reductases and <i>S</i> -adenosyl-L-homocysteinehydrolases.....	235
<i>Jean-Luc Décout and Stanislaw F. Wnuk</i>	
Methylenecyclopropane analogs of nucleosides as antiviral agents.....	267
<i>Jiri Zemlicka and Xinchao Chen</i>	

$\beta$ -L-2'-Deoxythymidine (LdT) and $\beta$ -L-2'-deoxycytidine (LdC): How simple structures can be potent, selective and specific anti-HBV drugs.....	309
<i>Gilles Gosselin, Claire Pierra, Samira Benzaria, David Dukhan, Jean-Louis Imbach, Anna Giulia Loi, Paulo La Colla, Erika Cretton-Scott, Edward G. Bridges, David N. Strandring and Jean-Pierre Sommadossi</i>	
Synthesis of analogues of <i>N</i> <sup>4</sup> -hydroxycytidine with potential anti-HCV activity.....	319
<i>Laurent Hollecker, Junxing Shi, Jinfa Du, Peiyuan Wang, Abdalla Hassan, Suguna Rachakonda, Steven E. Patterson, Noshena Khan, Ann Hobbs, Jeremy L. Clark, Byoung-Kwon Chun, Pinar Iyodogan, Stefania Lostia, Tamara R. McBrayer, Philip M. Tharnish, Michael J. Otto, Lieven J. Stuyver, Raymond F. Schinazi, and Krzysztof W. Pankiewicz</i>	
<b>CHEMISTRY AND BIOLOGY OF PRODRUGS, NUCLEOTIDES AND DINUCLEOTIDES.....</b>	<b>339</b>
5'-O-Modified nucleoside analogs as prodrugs of anti-HIV agents.....	341
<i>Marina Kukhanova and Elena Shirokova</i>	
Unsaturated acyclic nucleosides and nucleotides: Synthesis and antiviral properties...	365
<i>Alexander V. Ivanov and Maxim V. Jasko</i>	
Rational design of nucleotide analogs as mechanism-based inhibitors of thymidylate synthase.....	401
<i>Thomas I. Kalman</i>	
Recognition and inhibition of HIV integrase.....	431
<i>Vasu Nair</i>	
The mechanism of action and antileukemic activity of bis(phosphonate) analog of mycophenolic adenine dinucleotide (C2-MAD): An alternative for Tiazofurin?.....	447
<i>Steven E. Patterson, Paul L. Black, Jeremy L. Clark, Dipesh Risal, Barry M. Goldstein, Hiremagalur N. Jayaraman, Raymond F. Schinazi, and Krzysztof W. Pankiewicz</i>	
Methanephosphonate analogs of dinucleotides.....	457
<i>Lucyna A. Wozniak and Wojciech J. Stec</i>	
<b>CHEMISTRY AND BIOLOGY OF OLIGONUCLEOTIDES.....</b>	<b>479</b>
Oligonucleotides containing P-chiral methanephosphonamidate (3'N→MeP5') linkages: Synthesis, physicochemical and biological properties.....	481
<i>Barbara Nawrot, Milena Sobczak, Maria Maszewska, Marian Nowak and Wojciech J. Stec</i>	
Phosphorothioate oligodeoxyribonucleotides as inhibitors of T4 polynucleotide kinase activity.....	509
<i>Marcin Cieslak, Maria Koziolkiewicz, Wiesława Goss and Wojciech J. Stec</i>	

From isopolar nucleoside phosphonic acids to phosphonate oligonucleotides.....	519
<i>Ivan Rosenberg</i>	
Thermal stability and nuclease-resistance properties of oligonucleotides having an aminoalkyl side chain at the nucleobase and sugar moieties.....	549
<i>Akira Matsuda, Yoshihito Ueno, and Akio Takenaka</i>	
At the crossroads of biological and inorganic chemistry: Oligonucleotides and oligophosphates containing boron clusters.....	577
<i>Zbigniew J. Lesnikowski, Agnieszka B. Olejniczak and Raymond F. Schinazi</i>	
<b>Subject index.....</b>	<b>593</b>
